## TROOPS REQUESTED TO SUBDUCE MINERS

Rioting Strikers at Calumet, Mich., Get Beyond Control of Local Authorities.

MILITIA RECEIVES ORDERS TO BE READY, IF NEEDED

Gov. Ferris to Act With Caution, However—All Mines Are Closed.

CALUMET, Mich., July 24.—Strike violence occasioned by yesterday's walk-out of copper miners in this district grew beyond the control of Sheriff Crane today, and he wired to Gov. Ferris asking that state troops be dispatched to maintain order. The local militia companies were ordered to hold themselves in readiness for service pending word from the governor, who, it is understood, is on his way to Alpena from Lansing.

The chief attack of strikers today was directed against the Calumet and Hecla properties. Shortly before noon 300 men armed with steel drills, clubs and stones, and a few of them firing revolvers, directed the deputies stationed at No. 3 conglomerate shaft of the company of their stunts. The strikers then moved over to the Hecla branch mine and repeated their tactics. Several men were badly beaten and sent to the hospital in the fights that developed. The strikers also visited all surface plants of the companies affected and closed them. Stamp mills as well as mines are now shut down in the Lake Superior copper district because of the miners' strike. The tie up is complete with the exception of the smaller mines, some of which have enough mineral on hand to operate for a week or more. Calumet and Hecla conglomerate mines, which were worked yesterday, closed last night when the strikers prevented the company from working. Franklin and Hancock mines, which also worked yesterday, suspended last evening.

### Loyal Employees Attacked.

Mining Capt. Thomas Matthews of the Calumet and Hecla was attacked by strikers last night and knocked unconscious. A large body of strikers went from one shaft to another at the Calumet and Hecla and Tamarack and several loyal employees were attacked with stones and painfully hurt.

At No. 2 conglomerate mine, Calumet and Hecla a body of strikers was prevented from taking possession by the mining captain, who drew a revolver and threatened to shoot. This morning strikers gathered about the shafts to prevent the company from plying away. A large number of deputies have been sworn in, and it is believed they can control the situation, for the present at least. It is understood the companies will make no effort now to reopen the mines.

### Troops to Be in Readiness.

LANSING, Mich., July 24.—The first direct information received at the executive offices during the governor's absence was contained in a telegram received yesterday before noon today from J. W. Black, a Houghton county politician. He wired: "Local officials unable handle situation. A lot of disorder and violence last night, and you are justified in sending troops at once. Business men need best saloon-keepers urge that all saloons in Houghton county be closed." At noon today Adj. Gen. Vanderveer of the state militia received instructions from Gov. Ferris to have everything in readiness for the calling out of state troops if the situation demands it.

### Governor to Act With Caution.

BAY CITY, Mich., July 24.—Gov. Ferris, on his way to Alpena, but delayed here by a train wreck, said that he would not grant Sheriff Crane's request for troops in the copper mine strike district except as a last resort to protect lives. He said he believed the sheriff's message was "anticipatory." Before leaving Bay City Gov. Ferris telegraphed to Sheriff Crane instructing him to see that the liquor laws are obeyed to the letter throughout the strike zone.

### QUEEN MARY A GOLFER.

Royal Devotee Has Two Worthy Competitors in Oldest Sons.

Special Correspondence of The Star.

LONDON, July 12, 1913. Last year Queen Mary was induced, mainly by Princess Mary, to turn her attention to golf, and she was seen on the private links at Balmoral rather frequently. This year she proposes to devote more serious attention to the game. A well known professional is to be engaged to give her majesty lessons, and it is expected that she will be out on the links almost daily. This decision on her part is of decided interest, since in the past she has paid little or no attention to active outdoor amusement of any kind. The king plays golf but little, greatly preferring to devote his time to grouse shooting, salmon fishing and deer stalking, when staying in the highland home. But the Prince of Wales and his brothers are enthusiastic devotees of the royal and ancient, and Queen Mary can hold her own with either of her two eldest sons with a handicap of a stroke or a hole she will be doing very well.

### Goes to Study Mosquito.

To study the mosquito and its relation to malaria fever, the department of Agriculture has decided to send D. L. Van Dyne of the bureau of entomology to the territory around the delta of the Mississippi river, where the insect pest does much harm in disseminating the fever. He will be occupied probably six months or more in studying the disease.

### First to Take Out Papers.

CHICAGO, July 24.—Mrs. Adela Mikskaitis, president of the Lithuanian Women's Club, has the honor of being the first woman in Cook county to take out naturalization papers since the limited woman suffrage law went into effect in Illinois.

### CONCLUSIONS.

1st, 2d and 4th. Query in Literary Digest. "Do the letters 'at', 'd' and 'th' have to be followed by a period when used thus: 1st, 2d, 4th? What is this combination, an abbreviation, contraction or merely a sign?" In the forms 1st, 2d, 4th, etc., we have ordinal numerals in which an Arabic figure is substituted for the spelled-out name of the cardinal number from which the ordinal is derived. The letters added to the Arabic numeral form the specific inflection which changes the cardinal to an ordinal numeral. The forms in question, then, are neither abbreviations nor contractions, nor yet mere signs. They are like a hummer's beak before only they are not whimsical, as they would be if no one had seen them before, and some one should suddenly use them.

## RIKER AND HEGEMAN DRUG STORES

Washington Store, 1006 F Street

**FREE** Friday and Saturday Only—A Picnic-Size Bottle of Olives With Every Purchase of Our Famous **CLUB COFFEE**—Full 40c Value—Lb. 33c

## ELECTRON, WORLD'S SMALLEST THING

Billions of Them Do Not Bulk  
as Big as an  
Atom.

From Harper's Magazine.

We know that the big telescopes aided by the photographic plate, reveal stars the number of at least one hundred millions lying utterly beyond the confines of unaided vision. Now it appears that a pinch of salt which one could hold on the point of a penknife is made up of atoms numbering not hundreds of millions merely, but billions of billions.

### RELAPSE OF THE INDIAN.

Drops Sun Dance and Snake Dance and Hops the Turkey Trot.

From the New York Sun.

Nobody need be surprised to learn that the Shoshone Indians, gathered in Elko county, Nebraska, to celebrate the good hunting, have abandoned their tribal dances and reverted to the steps now fashionable among the white brethren.

### Pointed Paragraphs.

What one man has done a woman can undo.

You never have to dun a man who owes you a grade.

Few men are strong enough to keep their faces closed.

Many a courtship has been converted into a battleship.

Some spinsters advance step by step until they become stepmothers.

It's easy for the man with a candid opinion to eliminate friends.

Some girls who are anxious to get married are not so anxious to stay married.

If the late lady had kept up every woman would need two heads to pile her hair on.

A woman is unpopular with her neighbors if she never does anything that they can gossip about.

When a woman rattles the dishes more than usual while preparing supper it's a sure sign that her husband will hear something drop when he comes home.

Heard on the Wharf.

From the Boston Transcript.

"So you're going over on the steamer. Aren't you afraid you'll be seasick?"

"Not a bit. You see I've swung around on the straps of crowded trolley cars every day for years, so I'm used to a rough voyage."

### The Best Corrective

and preventive of the numerous ailments caused by defective or irregular action of the organs of digestion is found in the safe, speedy, certain and time-tested home remedy.

### ANCIENTS UP-TO-DATE.

Egyptian Priests Used Slot Machines 2,000 Years Ago.

From London Times.

This is but one of the many interesting cases of the antiquity of modern inventions, related by Mr. H. E. Dudeney in the Strand Magazine. It is astonishing, but nevertheless true, that more than 2,000 years ago Egyptian priests were using a penny-in-the-slot machine, the mechanism of which was practically identical with that of the machines to be found on every railway station today.

The ancient machine, the inventor of which was Heron, was used for supplying sacred water at the doors of the temples. A coin was dropped from the top, fell on one end of a balanced horizontal lever, which, when depressed, opened a valve suspended from a chain on the other end, and the water thus began to flow. When the lever had been depressed to a certain angle the coin fell off, and the lever, being weighted, returned to its seat, and thus cut off the supply.

The taximeter was in use about a hundred years ago, and was sold in various quantities in Leadenhall street, London, at from 25s to 28s, while not only the modern taximeter but also wireless telegraphy was foreseen as long ago as 1632, when Hieronimus van Etten suggested in a little book called Mathematical Recreations, that a person in London might communicate with one in Paris by means of a magnet.

Many, by the help of "Magnetism" (presumably magnetism), Van Etten suggested that if each of the persons had a needle touched with Magnet, and secret notes or alphabets, they would be able to move the needle and indicate letters, and thus convey messages.

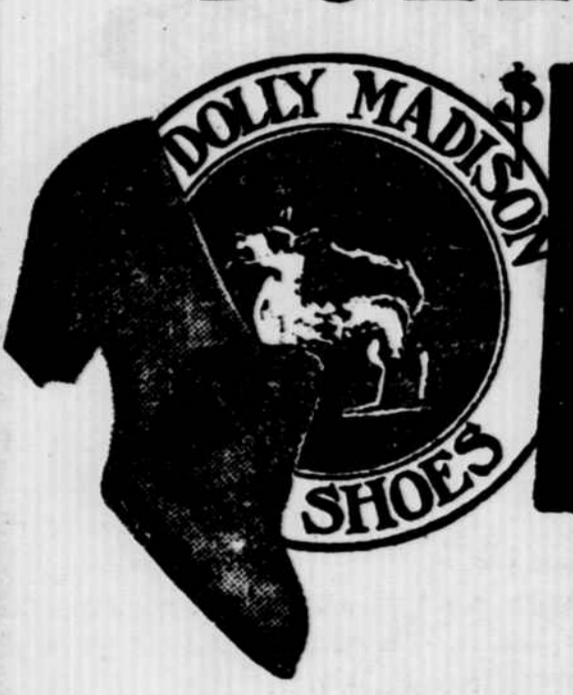

### Nationality and Heads.

From the Strand.

The study of heads reveals some interesting facts. One is that the left side of the head is almost always larger than the right, and it is said, to the universal practice of using the right hand more than the left. Another curious point is that nationality considerably affects the shape of the head. No one needs reminding of the round, bullet-shaped skull of the negro, but the latter will assure us that a Frenchman's head is rounder than an Englishman's, and similarly an Englishman's rounder than a Scotsman's. The average Scotch head is rounder than the average English head, and the average English head is rounder than the average French head.

The Slavonic head is narrow in front and very broad at the back. When the recent peace conference took place in London a few months ago, the first thing that the delegates of the Balkan states did on arrival was to call on Messrs. Heath with a demand to be immediately fitted out with the top hats that their new position necessitated, and that famous firm was well-nigh unprepared to provide, at instant notice, hats of so totally unusual shape.

3 RELIABLE SHOE HOUSES

Good Tidings for Smokers.

From the New York Sun.

Tobacco smoking is not so pernicious in its consequences as the average man is inclined to believe. Those who regard the weed with affection are not infrequently disturbed by tirades against its immoderate use or by the solitude of anxious relatives regarding its more or less deleterious influence on body and mind. It may be comforting to the reader who smokes to learn that the Sun's
